ABSTRACT

The corona virus, which started in Wuhan (China), has spread to develop and underdeveloped countries, with the best impact being thus far on the developed countries like America, Italy etc. the most important impact of Lockdown has been on the economy, here we cannot exclude the impact mainly on education, the normal education that lockdown wont to bring back students is now completely pack up somewhere. The impact of lockdown on education has been mentioned during this paper issue, the education issue has become very big and similarly within the future, exams altogether schools and colleges in Maharashtra (India) are cancelled, mainly on traditional education of scholars and what they believe online education during the lockdown period and its consequences, with the assistance of a couple of questions.

Keywords: Covid-19, Lockdown, Online education, WHO

INTRODUCTION

While the corona virus has had a worldwide impact on education and therefore the education-based sector, it's widely agreed that radical changes within the education sector are needed until the corona virus is eradicated. Additionally, the WHO states that the corona virus is a smaller amount likely to be deported which it's an epidemic almost like AIDS. The epidemic of corona virus has also changed the way many people round the world are educated. The fourth phase of lockdown, announced or implemented within the country, has had a devastating effect on quite 1,000,000 students. Additionally, 22 other countries have also announced partial "local" closures. With the rapid spread of the corona virus in Asia, Europe, the center East, and therefore the us, these countries have taken swift and decisive action to scale back the event of the disease as an entire. Within the last fortnight, there are several announcements to suspend the attendance of scholars in schools and universities also as cancellation of exams. These decisions, aimed toward overcoming the crisis, have led to temporary 'home schooling' for many students, especially in countries like China, South Korea, Italy and Iran. Reasons include the foremost affected countries.

These changes have certainly been inconvenient, but they need also given new samples of educational innovation⁴. To assist reduce the spread of corona virus, students from different parts of the planet, including India, started reading and learning reception through interactive applications. Most of the people have access to educational materials through live television broadcasts. As 5G technology becomes more prevalent in countries like China, USA and Japan, learning and teaching anywhere, anytime, teaching and learning is moving towards the adoption of certain sorts of digital learning concepts, New methods of learning will replace traditional individual classroom learning, from live broadcasts to “Educational influencers” and experiences of computer game .

Teaching is going to be a habit which will organize lifestyle. Educational associations and alliances with various stakeholders, including governments, publishers, education professionals, technology providers, and telecommunications network operators, can form which will be combined to use digital platforms as a short lived solution to the crisis. In emerging countries where education is primarily provided by the govt, it can become a prevalent and consequential trend for future education. This epidemic is additionally a chance for college kids to form decisions during this uncertain world, to form informed decisions, to unravel problems during a constructive way, and most significantly to adapt to situations where skills got to be learned. To make sure that these skills are going to be elementary for all students, flexibility must be developed in our academic systems.

There's tons of confusion within the education system of India and students are unable to follow their regular academic routines. Against the backdrop of this emergency and considering the security of scholars and their educational issues, most of the institutions have taken initiative to facilitate telecommunication, Skype call, Zoom application and other virtual options to scale back the space in education. It's training students and teachers to use virtual classrooms and technology to facilitate the exchange of data. Undoubtedly, this is often a really important time for college kids. Therefore, the target of the scheme is to scale back the pressure on the scholars and help them to use their time during a beneficial way without compromising on quality.

Although there are innovative changes within the student body during this Corona era, there are some negative issues, digital issues can create the psychological state of the scholars , these issues the scholar wanders anywhere. learning, a problem that's mainly surveyed online and involves total hundred graduate and postgraduate students, and seeks to understand what they believe it, and sent students from different areas through social networking and sought their views on the impact of lockdown's periods issues on education, survey issues included a spread of questions, the results of all opinions has mentioned in results and discussion point.

RESULT AND DISCUSSION

Following the web survey, the results are as follows, consistent with our survey, quite 90 per cent of scholars think that Lockdown has had an enormous impact on education; only a few students feel that it's any effect and a few students are neutral. More than 50 per cent of the scholars feel that the university has made a wrong decision to cancel the exams, a problem that mainly involves smart students, assuming that their past marks are verified. Only 27.7 percent of scholars think the university's decision is true and 16.9 percent can't say anything.

More and more students feel that they cannot consider their studies, their minds are filled with fears about Corona virus, all of this has distracted them, the various daily news affects their psychological state tons, in order that they need to specialize in their studies. Can't concentrate. Some students feel that there's a positive effect of Lockdown. However, students are learning very different online courses, mainly webinars, Zoom application, Google classroom etc. is using. They're learning tons from these Lockdown issues. Most of the scholars think that the exam should be done online in order that the corona viral infection is reduced.

Some students think that the exam should be taken after the lockdown, but the exam shouldn't be canceled. More than 50% of the scholars think that it might be more beneficial for the school professors to require hours online because the scholars became familiar with teaching their professors, the scholars can absorb it well.

There are tons of teaching mediums available online but students don't feel the effect well. Greater than Forty-three percent of scholars feel that lockdown does usually have an impact on their education, quite 41% of scholars say that a couple of issues affect lockdown, and 12.3% think they can't say anything about it. More than 41% of scholars think that the expenditure on education will certainly increase during and after Lockdown.

20% of scholars think that any amounts spent on education are going to be an equivalent as before Lockdown and 18.5% of scholars think that the value has not increased and can not increase in any way and therefore the other 20% of scholars cannot say anything about it. 35.4% of scholars think that Lockdown is a chance to vary education issues and 35.4% of scholars don't think this is often a chance. 18.5% of scholars are mediators about this and other students can't say anything about it.

CONCLUSION

After taking the opinion of the scholars, it's understood that Lockdown features a definite effect on education. Thanks to Lockdown issues, students can't consider their studies and a few students say that there's positive impact. Exams should be conducted online only and college professors should take online lectures during the lockdown period. These issues have increased the value of education to

some extent and these issues haven't only affected the education sector but also all sectors. Some students also think that it's a chance to innovate on lockdown issues.
